## How to Care for the Feet

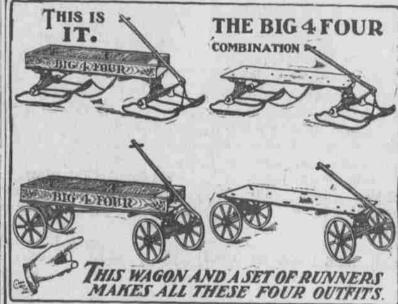

Ordinary attention to the feet equires that they be given bath daily. The clothing of the feet more than that of the rest of the body prevents the sun and air from reaching these members and doing their work of purification. And often, even when in Has had one frightful drawback "undress," while other parts of the lieu the water used should be fortably warm. When this is Mrs. Sallie D. Russell and Miss the temperature of the water, tion to plunge the feet into cold of Forsythe, water in order to close the pores. to The feet should then be thorough-T. ly dried.

Those whose occupation sometimes swollen feet. condition can be considerably relieved by adding a little bicarbonate of soda or borax to the foot bath- Hot salt baths also afford great relief to tired swollen feet. About a glassful of brine to a quart of water is about the right proportion It is advisable to prepare a quantity of brine beforehand and use when necessary. A good brine is made by dissolving a quart of sea salt in four quarts of water-From September Physical Culture-
